ERASIUS C. BENEDICT.)

To the Editor of The N. Y. Tribune:—Six: In reply to an ariole published in your paper of the 17th lest, respecting the affairs of the Arioan Methodist Epiacopal, Bridge steburch, in the city of Brooklyn, it becomes necessary to say, that the Trustees have acted in strict accordance with the decision of the court. As trustees or agents, they have endeavored to make a procer disposal of the funds of the church, and as no evidence has been produced that reflects in any shape or manager upon their integrity or the Successive of their services, it seems illiheral indeed on the part of their opposition; and more so, to context the grave opinions of several of the most esteemed and learned interpreture of the law. Had any positive proof of willfulness or lacapacity been brought against the trustees, any sign of a neglect of their most so emm cuites or any direct injury to the church been made apparent by their mode of proceeding, the congregation might have been justified in asking for their removal; but as their conduct has been actuated by moral and christian principles and a centre to place the affairs of the church in a sound and enviable condition, they fear not the threats nor the assisting of their enemies.

Twenty thousand copies have already been sout in the value alone.

The distinguishing feature of this new edition, and that which greatly enhances the value of the work is the SUPPLEMENTARY CHAPTER

which the author has added, and in which he encounters the "latest form of infidelity," that has arisen since the book was first published. The progress of error made this addition necessary for its complete adaptation to the present time. This chapter discusses the subject of a "book revelation," and is entitled:

"AN OBJECTIVE REVELATION NECESSARY AS A MEANS OF THE MORAL CULTURE OF MANKIND"

The discussion of this topic is in the author's happiest vein, and the New Infidelity receives a staggest a blow. The discussion of this vopic version as staggering blow.

The subject of immertality and intercourse between Spirits
and Mortals demonstrated by so learned and asientific a mac,
must secure for this book a reading by every fireside. The
Doctor says in reviewing Centric's Philosophy:

"Thus while allowing the athelet his material dominion,
Spiritualism will erect within and above the same space a deminion of an importance as much greater as eteratity is to the
average duration of human life and as the boundless regions of
the fixed stars are to tae habitable area of this globs." Again he
says: "On the 3d instant, being at Cape May, I requested one
of my guardian spirits to go to my friend Mrs. Gourley, No. 178.
North Tenth-st., Philadelphia, and request her to induce Dr.
Gourlay to go to the Philadelphia Bank, to ascertain
at what time a note would be due, and that I would
sit at the instrument at \$\frac{1}{2}\$ o'clock, to receive the answer. Accordingly, at that time, my spirit friend manifested
bettelf and gave me the result of the laquiry.
On my return to the city I learned from Mrs. Gourlay that my

The N. Y. Observer having received an early copy, talks as follows of this capital book:

"A volume more full of geoial humor and irresistible Yankee charactes has not yet been published—not even excepting the expeniences of the recowned. Sam Slick." The affect authorizes was cut off by death before the had attained to that distinction as a writer which she would modulatedly have secured had she been spared to the development of all her powers. We would not seek thus highly of a work of mere humor, but these papers contain most admirable satires upon many of the vices and follies that infest religious societies, and therefore are the more free to commend the book."

A New York Correspondent of The Louisville Journal, having examined the proce-sheets of this book, writes thus:

"It is an earnest and truthful story of progressive childhood under all its varied influences of circumstance, association, and opinion. There is no intricacy of p.ot, or marvelous adventure, in the tale; yet it preserves a continued interest throughour; and by its simple character for non-industrial threat throughour; and by its simple character for insensibly beguled into the consideration of important Chris-ian truths and high moral principles. Such reachings, through the pages of fiction, cannot be too highly praised. The young hereine of this book is presented in the charming character of an artiess, happy child; and as it is said there are no children now a days—only preceding men and women—this graphic portrait of one of the old times race of invenient and confiding, her least instinctively opens to the hand of affection, from which the good seed is scattered which after ward bears its appropriate figure in the ritle. The other charesters are bappily delineated, each preserving its peculiar individuality. Life, in its daily routine of action, is unfolded on the page. The courtly, polished man of the world is seen, ever clothed in the politeness of his saste. The warm hearted, eccentric philantropits figure s humorously—with his oddities; and the gentle, Christian pastor, placed in controlistinction with the thundering Bonaneages of inc pulpit, succeeds in making manifest his outet power."

Real Estate for Bale.

THE ILLINOIS CENTRAL RAILROAD COMPANY
IS NOW PREPARED TO SELL SYRE TWO MILLIONS OF ACRES
OF SELECTED

PRAIRIE, FARM AND WOOD LANDS,

PRAIRIE, FARM AND WOOD LANDS, IN TRACTS OF 40 ACRES AND UPWARD, To seit purchasers, on long credits and at low rates of interest. They were granted by the Government to encourage the building of this Railmod, which runs from the extreme north to the extreme north to the extreme north of the State of Illinois. It passes, from end to end, through the richest and most fertile Prairies of the State, dotted here and there with magnificent Oak Groves. The recent opening of nearly 500 miles of this road throws open the lands for cultivation. They are scattered from one to fifteen miles on each side of it, through its entire length.

The soil is a dark, rich mold, from one to five feet in depth, is gently rolling, and peculiarly fitted for graning cattle and sheep, and the cultivation of wheat, fadian corn, &c.

The first crop of Indian corn planted on the newly broken prairie usually pays the cost of plowing and sometimes fencing.

Wheat sown on new turned sod is sure to yield very large profits.

The first crop of Indian corn planted on the newly broken prairie unally pays the cost of plowing and sometimes feneing. Wheat sown on new turned sod is sure to yield very large profits. One man with a plow and two yoke of oxen will break one and a half to two acres per day. Contracts can be made for breaking, ready for corn or wheat, at \$2 to \$2 50 per acre. By ladicious management farms may be broken and fenced the first, and under a high state of cultivation the second year. The larger yield on the chean lands of Illinois, over high-priced lands in the Eastern and Middle States, is known to be much more than sufficient to pay the difference of transportation to the Eastern market. The rapid increase and growth of flourishing towns and villages along the line of this road afford a growing home demand for furm produce.

Coal and wood are delivered slong the road at different points, at from \$1.50 to \$4 the cord or inn.

Parties having in view Iowa, Kanssa, Nebrasks, or Minnesota for their future homes should take into consideration that the country west of the Mississippi is destitute of railreads; that the conveniences of transporting grain and produce from farms on the line of the Illinois Central Railroad, direct to the great from \$150 per sers higher than in government lands in Iows. In other words, that it costs so much more to set produce from the interior of the country west of the Mississippi to the Eastern market, that the farmer will find it much more profitable to locate on the line of this railroad.

PRICE AND TERMS OF PAYMENT.

The price will vary from \$5 to \$25, according to location, quality &c. Contracts for deeds may be made during the year [855, stipolating the purchase money to be paid in five annual installments—the first to become due in two years from date of contract. By the 22d section of the Act of the Legistatre, approved left February, 1851, these lands are free from taxation until they are paid for and a deed of conveyance granted to the purchaser. Interest will, see charge granted

paid for and a deed of conveyance granted to the purchaser.

INTEREST WILL BE CHARGED AT ONLY TWO FER CERT FER.

As a security for the performance of the contract, the first
two years' interest must be paid in advance, but it must be underatood that one-tenth of the land purchased shall yearly be
brought under cultivation. Longer credits at six per cent per
amum may be negotiated by special application. Twenty per
cent from the credit price will be deducted for cash, in which
case the Company's Construction bonds will be received as cash.
It is believed that the price, long credit, and low rates of interest charged for these lands, will enable a man with a few
bundred dollars in cash, and ordinary industry, to make himself
independent before all the purchase money becomes due. Meantime the rapid settlement of the country will probably have increased their value four or five fold. When required, an experienced person will accompany applicants to give information
and aid in selecting lands.

Large Plats, showing the precise location of the lands throughout the State, may be seen at the office of Bands, and Pamphiets,
containing interesting information, accompanied by sumerous
letters from respectable farmers throughout the State, may be
added to any part of the company's lands, and Pamphiets,
